Application for ABPS Practice Assessment Credit for Registry Participation

Overview

The ABPS Continuing Certification program was designed to recognize the work that physicians are already doing to improve patient care in their practices. Participation in national registries followed by practice comparison to those of peers can result in improved practices. The ABPS will recognize this type of activity for the Practice Improvement component of Continuous Certification.

The approved registries at this time include: ASPS TOPS, ASPS GRAFT, ASPS NBIR, ASPS QCDR, ASPS NSQP, and ASAPS ANN.

To be eligible for credit, please submit the below Project Description and Attestation along with a report from the database that documents the complete entry of at least 10 cases of the same procedure. This report should display your practice results for this procedure compared to the registry aggregate.

The ABPS Continuous Certification committee will determine whether the project meets these goals and whether the project contains significant scope to warrant Continuous Certification credit.

When the Practice Assessment plan and registry reports are submitted, the requirements will be satisfied in lieu of the Tracer Procedure Log on the Tracking Page for the current year.
