Written Examination Schedule

The Written Examination Computer Based Test consists of the following format:

- 15-minute practice exam (strongly recommended).
- The examination will be comprised of 250 scored items and 50 unscored items.
- The 50 unscored items will not be identifiable to the candidate. This pretesting allows the Board to analyze the psychometric properties of an item prior to it being included in scoring.
- All items are multiple-choice with single correct answer.
- The items are formatted in three blocks of 100 items.

- Each exam block is 100 minutes.
- Total break time is 60 minutes (optional).
- Total test appointment time is approximately 6.5 hours.
- There is a survey at the end of the examination. This survey does not interfere with the time allotted for you to take the examination (optional).

All candidates will have the same number of questions and the same time allotment to take the examination. Within each block, candidates may answer questions in any order and review and/or change their answers. After exiting a block, or when time expires, no further review of questions or changing of answers within that block is possible.

Candidates will have 60 minutes of total break time, which may be used to make the transition between blocks and for a break. A break may only be taken between each block of questions. Candidates are encouraged to bring refreshments (to leave in the car or locker) as not every test center location has restaurants nearby.

The subjects covered in the examination are listed in the Booklet of Information. The examination covers the entire field of plastic surgery. The content outline and exam blueprint are enclosed and are posted on the Board's website <https://www.abplasticsurgery.org/candidates/examination-content/>.

Questions can be directed to written@abplasticsurgery.org.

TIMELINE FOR 2025 ORAL EXAMINATION CANDIDATES
